Professional Summary

Informatics Engineering student at Tarumanagara University with a cumulative GPA of 3.94/4.00 through Semester 5. Experienced in software development projects, technical mentoring, and online business operations. Has contributed to web and mobile applications involving frontend interfaces, backend APIs, authentication, and databases, and conducted a Steam review sentiment analysis using a stacking ensemble. Seeking a General IT Internship to apply technical knowledge, analytical thinking, and problem-solving skills in a professional environment.

Education

Tarumanagara University Jakarta, Indonesia
Bachelor of Informatics Engineering *2024 – Present*

- **Cumulative GPA: 3.94/4.00 (Semesters 1–5).**
- Relevant Coursework: Data Structures, Operating Systems, Back-End Programming, Front-End Programming, and Fundamental Programming. Web Development, Software Development

Experience

Teaching Assistant 2026 – Present
Faculty of Information Technology, Tarumanagara University *Jakarta, Indonesia*

- Supported lecturers in programming and computing courses, including Back-End Programming, Front-End Programming, Data Structures, Operating Systems, and Fundamental Programming.
- Assisted students across seven classes, supporting more than 400 students with programming concepts, practical assignments, and debugging.
- Explained technical concepts, guided students through problem-solving exercises, and helped troubleshoot code during laboratory and consultation sessions.
- Collaborated with lecturers and fellow teaching assistants to coordinate learning activities and support students' progress.

Online Store Owner 2021 – Present
Independent Online Business, Itemku

- Manage online sales and customer support through Itemku, serving more than 30,000 customers from different countries.
- Analyze marketplace trends, customer demand, and competitive conditions to inform pricing and sales strategies.
- Handle customer inquiries, transactions, and after-sales support while managing day-to-day business operations.
- Lead and coordinate a team to manage daily business operations, oversee workflows, and ensure efficient service delivery.

Private Tutor 2019 – 2023
Independent

- Provided private tutoring for elementary school students and adapted explanations to individual learning needs.
- Prepared engaging learning activities to improve student participation and understanding.
- Conducted monthly consultations with parents to discuss student's learning progress

Event Crew June 2026 – July 2026
PRJ 2026 – Games, Photobooth, Self-Service, and Kopi Tubruk Gadjah Main Booth *Jakarta, Indonesia*

- Supported booth operations by assisting visitors with games, photobooth activities, and self-service coffee equipment.
- Helped maintain booth readiness, stock, and smooth daily operations while assisting visitors and coordinating with the crew.

Web Designer 2025 – Present
Freelance / Independent

- Design and develop websites for businesses based on their specific needs, goals, and preferences
- Work directly with clients to understand their requirements and translate them into functional user-friendly website solutions
- Manage website development from initial discussions and design planning to implementation and revisions

Projects

MyPSKD (Best Project) – Learning Management System | *Flutter, Dart, Node.js, Express.js, Firebase*

- Contributed to a mobile learning management system designed to support digital learning workflows for school administrators, teachers, and students.
- Worked on features including role-based dashboards, announcements, assignment submissions, attendace, cheating detector based on user's behaviour
- Developed backend functionality using Node.js and Express.js and integrated Firebase Authentication and Firestore for authentication and data management.
- Considered Firebase free-tier constraints and data read/write efficiency when designing application interactions.

Vercel: https://mypskd.vercel.app/

UCCD – Student Hub | *Next.js, Bootstrap, Node.js, Express.js, Prisma, MongoDB*

- Served as Lead Developer in a team project building a student-focused web platform to organize information about campus activities and student opportunities.
- Worked with Next.js and Bootstrap on the frontend and Node.js and Express.js for backend application functionality.
- Used Prisma and MongoDB as part of the data layer and coordinated implementation work to translate project requirements into application features.

Vercel: https://uas-front-end-kelompok-8.vercel.app/

Tokoclone – E-commerce Web Application | *Laravel, PHP, MySQL, Blade*

- Developed an e-commerce website inspired by online marketplace workflows, applying server-side web development and relational database concepts.
- Used Laravel and PHP for application logic, Blade for templated views, and MySQL for relational data storage.
- Structured shopping-related pages and workflows to practice organizing product information and the online shopping experience.

GitHub: https://github.com/aryaravapradana/uasbackend

Mall Loyalty Member App | *Flutter, Dart*

- Worked on a mobile application concept for mall loyalty membership and customer engagement.
- Applied mobile application and interface design principles to organize membership-related information and customer-facing workflows.

GitHub: https://github.com/aryaravapradana/mobproguts

Steam Review Sentiment Analysis – Stacking Ensemble | *Python, TF-IDF, Sentence Transformers, Scikit-learn, BERT*

- Analyzed approximately 720,946 Steam reviews across 743 games, with 717,120 records remaining after preprocessing.
- Combined TF-IDF text features with 384-dimensional sentence embeddings from all-MiniLM-L6-v2 to represent review text.
- Built a stacking ensemble using Linear SVM, Random Forest, and a BERT classifier as base learners, with Logistic Regression as the meta-learner.
- Achieved 89.27% accuracy and a weighted F1-score of 89.09% in the reported evaluation.

GitHub: https://github.com/Perancesco/Steam-Review-Analysis

Personal Portfolio Website | *React.js, Tailwind CSS, Vercel*

- Designed and developed a personal website to present projects, technical skills, and professional experience.
- Organized project information and contact channels to make work samples accessible to recruiters and collaborators.
- Published the portfolio using Vercel.

Technical Skills

Programming Languages: Java, Python, C++, JavaScript, PHP, Dart, SQL, PL/SQL
Web Development: HTML, CSS, React.js, Next.js, Node.js, Express.js, Laravel, Bootstrap, Tailwind CSS
Mobile Development: Flutter, Dart
Databases: MySQL, MongoDB, Firebase Firestore, Oracle SQL
Data Analysis / Machine Learning: Pandas, NumPy, Matplotlib, Scikit-learn, NLP, TF-IDF, Sentence Transformers
Tools: Git, GitHub, Visual Studio Code, Android Studio, Postman, Vercel, Firebase

Additional Information

Languages: Indonesian, English
Core Competencies: Problem-Solving, Analytical Thinking, Communication, Teamwork, Adaptability, Time Management
